

Nordisk Fly-Away Kit ULD

Fly-Away Kit ULDs are used for storage and transportation of spare parts and tools, such as spare wheel and tyre assemblies, jacking pads and spare bulbs, and help reduce costly aircraft down time at out stations.

ALL YOU NEED IN ONE PLACE

Nordisk's Fly-Away ULDs are designed for safe storage and easy loading and unloading of kit items. For instance, all Nordisk Fly-Away ULDs are equipped with a sturdy and foldable loading ramp which makes it easy to roll heavy wheels in and out of the container. The Wheel Cribs can be adjusted to allow transportation of alternative wheel dimensions and numbers. Horizontal bumper rails are fitted with seat tracks for securing of items, and all Nordisk Fly-Away ULDs are supplied with 5 straps with seat track studs.

Smaller items are safely stored in the Out-Board rack and the transparent (optional) share panel wall makes it easy to identify the Fly-Away Kits content.

CUSTOMIZED TO YOUR REQUIREMENTS

Nordisk's Fly-Away Kit ULDs come with both soft and solid door configuration. Kits that are kept permanently on-board are recommended equipped with soft doors for maximum accessibility. The interior can be adjusted to fit your specific needs.

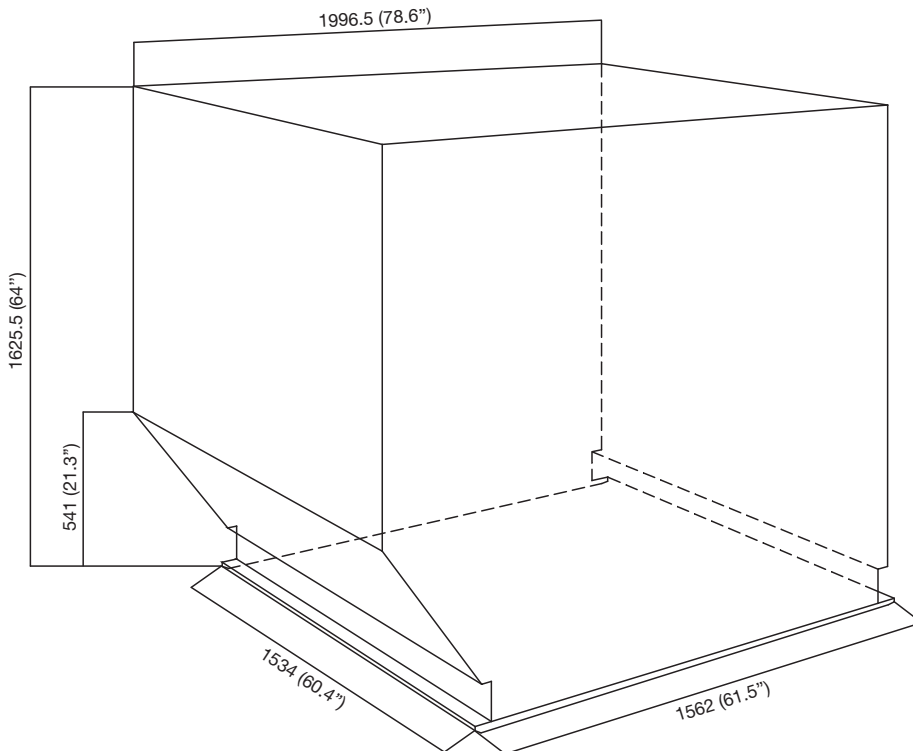

The standard Fly-Away ULD has an AKN* contour and can be supplied in customized colours for easy identification.

* Half width container, LD 3/AKE size with forkliftable base

Nordisk Fly-Away Kit ULD

The Out-board section is fitted with adjustable and removable shelves.
